LAING offers permanent, long or short-term accommodation solutions for many applications. Our units can be quickly set up and deployed and we offer a large selection of accessories including stairs and landings plus furnishings for offices, sleeping quarters, break rooms, changing rooms and kitchenettes. The comprehensive selection of accessories like acoustic panels, whiteboards, finger pinch protection for doors make these mobile accommodations fully-customisable.

Our most popular accommodations for workers who are housed (either onshore or offshore) for a long period of time are our modern, easy fix, self-contained accommodations, completed with ensuite bathrooms, kitchenettes, living and sleeping areas.

FULLY INSULATED
BLAST PROOF
PREMIUM GRADE
CONTAINERS

- 20 or 33 ft sizes
- Easy plumbing and eletrical connections
- Ready-made or custom designed to suit you

LAING is a distributor of the DNV 2.7-1 / 2.7-2 / 2.7-3 and CSC approved offshore containers, a bespoke accommodation solutions for all non-hazardous areas onboard all types of platforms, barges and supply vessels.

Next to the wide selection of standard modules, we can provide custom-built units to meet your requirements, approvals and certifications you may require. This includes ATEX or ER zone 1 and 2 certified modules to allow installation in hazardous areas.

All our containers are A60 Fire Rated and are also available to be “Blast Rated” exceeding 300 mbar.

Our system allows you to add a wide variety of rooms on to existing vessels, without the need for major technical modifications. Ranging from office areas and conference rooms to living quarters and sanitary facilities. Modules can be used to add functionalities quickly and cost-effectively.

SALES & RENTALS (Heavy & Light)

SKID STEER LOADERS

The Skid Steer Loaders travel and work where other machines can't. They give their operators the ability to complete a variety of jobs in limited-access areas.

MANLIFTS

We carry engine powered articulating boom lifts which gives the extra reach needed to work over and around the job site. These units offer exceptional outreach, high capacity, versatile performance and easy maintenance. Our fleet includes 65-135 ft. options.

BACKHOE LOADERS

Featuring productivity, versatility, comfort, safety and serviceability, our backhoe loaders are machines that combine excellent trenching, excavating, loading, lifting and material handling capabilities with the benefits of a single machine.

(2.5 - 16 tonnes) FORKLIFTS

Our range of diesel and LPG powered forklifts with up to 15 tonnes of lifting capacity are designed to fulfill a range of requirements. Available in a variety of sizes, they are robust and efficient, ensuring your jobs are completed safely.

EXCAVATORS

Our excavators are easy-to-use when precision grading, maximizing engine output and saves fuel by keeping a constant balance between pressure and flow. Available for rent or sale and range up to 2.5 - 4.5 tonnes. Our compact mini excavators are multi-purpose small machines that enable you to work in tight spaces that larger excavators and backhoes can't access with various sized buckets.

COMPRESSORS

Rotair's ultra-quiet, diesel powered, rotary screw air compressors are ideal for most air powered tool applications, from a single tool (185 cfm) to industrial, construction and oil and gas industry.

Smart design allows easy access to all compartments, gauges, and filters. Safety features include protective shutdown switches for high engine temperature, low engine oil pressure, and high compressor discharge temperature.

FUEL CONTAINMENT UNITS

Constructed of double wall steel, the TRANSCUBE transportable fuel tanks are designed to quickly and efficiently handle fuel requirements for diesel equipment and temporary power applications.

All TRANSCUBE tanks carry the following approvals: CFR 49, Part 178, Sub-part N 178.700 (performance oriented standards) and Sub-part O 178.800 (testing requirements for IBC's identified in Sub-part N), UL 142 Listed for safe storage of fuel.

CENTRIFUGAL PUMPS

Complete line of high-performance pumps for solids and clear liquids handling. Available in many configurations for Agriculture, Mining, Construction, Waste Water, Industrial Power Generation, Environmental, Sewage bypass, Flood, Silt Returns, Site Dewatering. Vacuum-assisted, leak resistant, self-priming, also available for submerged pumping duties.

GENERATORS

Portable and stationery generators for Industrial and domestic use, equipped with automatic control panel, spark arrestor and engine over-speed shut off valve. Designed for high power demands.

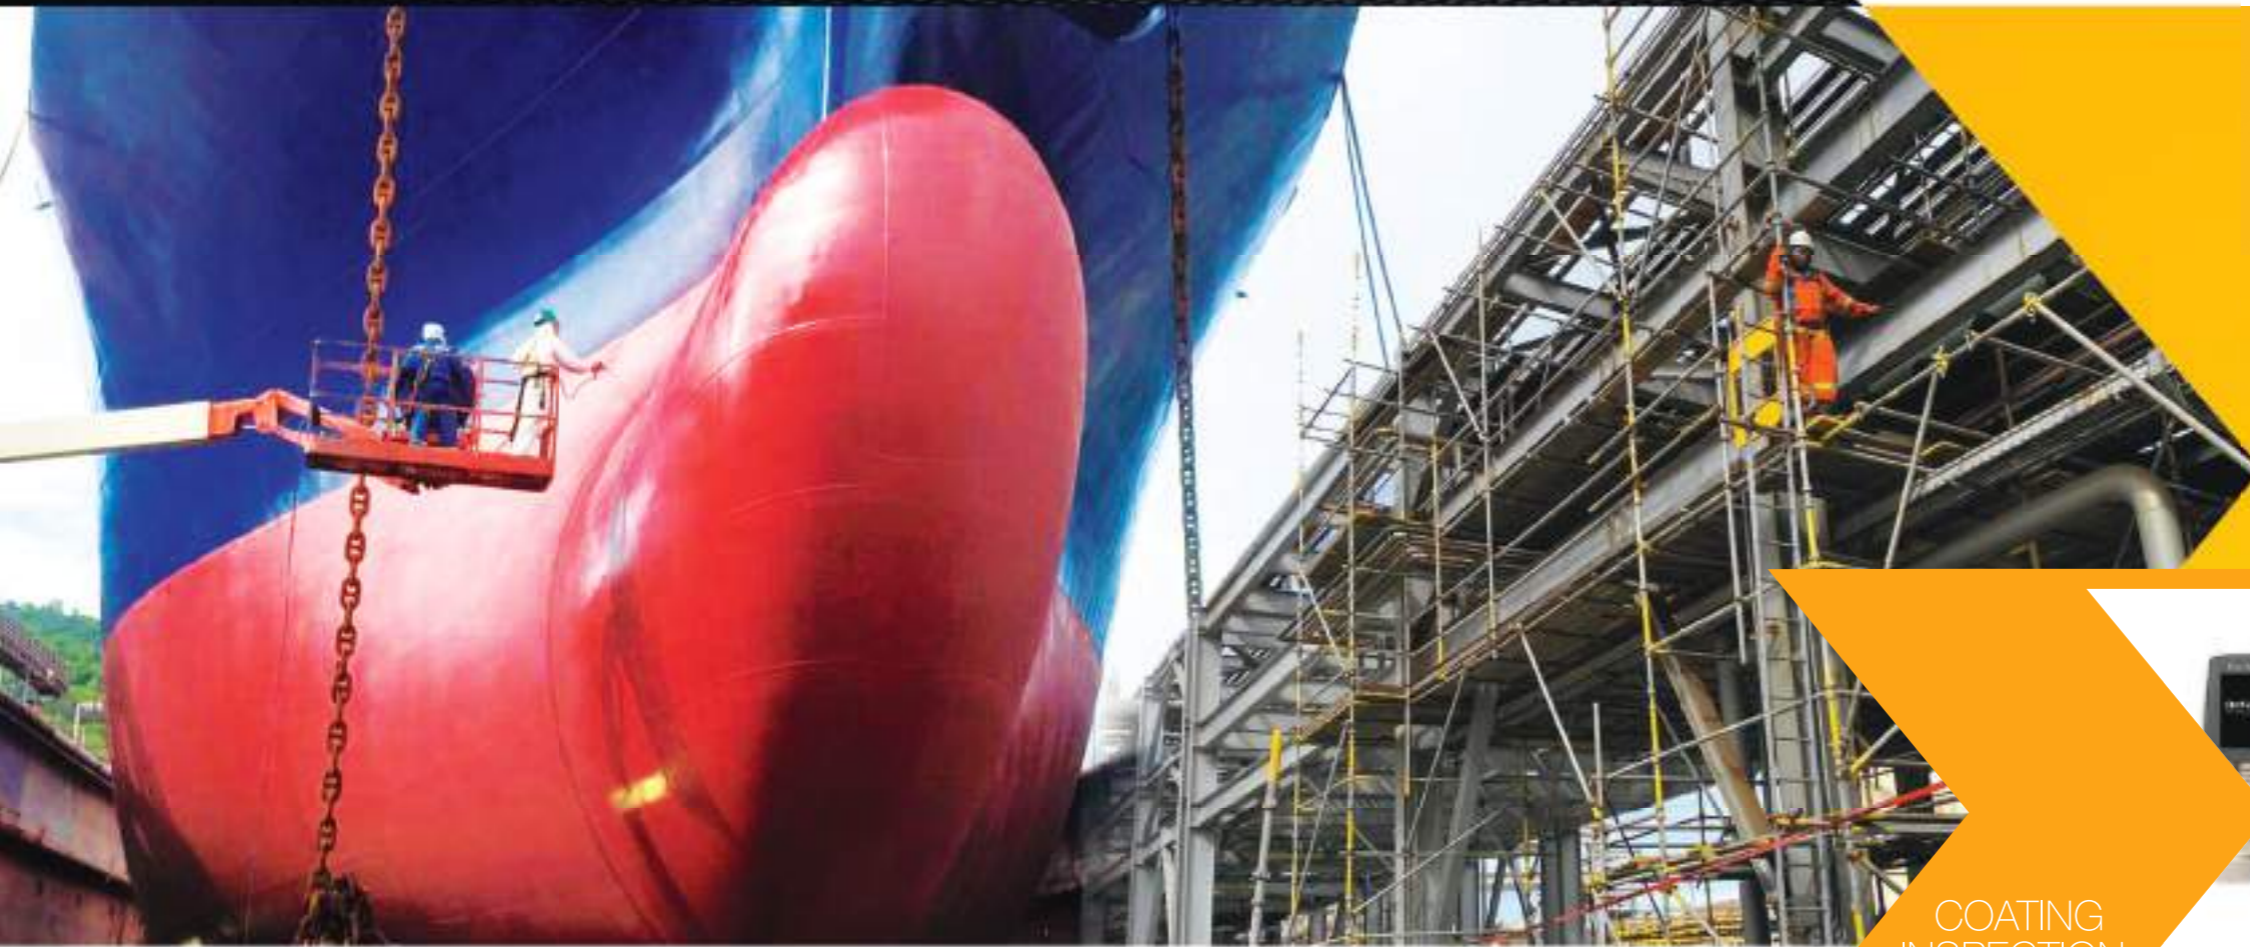

LIGHTING TOWERS

Durable, explosion proof, 4,000 Watt lighting towers. Guarantees larger coverage area thanks to brighter reflectors.

*We supply compressors with hoses and accessories with certified operators at your request.

FABRIC MAINTENANCE, SUBSEA & TOPSIDES SERVICES

WE ARE EXPERTS IN:

- Sand blasting
- Dust-free vacuum blasting
- Ultra High Pressure (UHP) Water Jetting (up to 40,000 PSI)
- Steam Cleaning
- Tank Cleaning
- Coating Inspection
- Rope Access
- Scaffolding

COATING INSPECTION KITS

WATER JETTING

Our Ultra High pressure, 40,000 PSI blaster is a specialized equipment used where sandblasting might not be safe or cost effective. We offer units ranging from 4,000 PSI to 40,000 PSI

SANDBLASTING & PAINTING

This blasting method cleans any substrate off all old paint, grease spots, old paint, mill scale, rust and other impurities. Additionally, the abrasive particles create a profile which helps the primer bond to the substrate.

Coating increases the lifespan of assets and are able to provide protection against extreme environments and climates.

SUBSEA SERVICES

Our services are geared towards concept and detailed engineering of subsea facilities as well as support for IRM activities. We are able to provide specialist support from a wide range of teams across Guyana, Trinidad, Houston and Aberdeen.

TOPSIDE SUPPORT SERVICES

We are capable of providing Operational Engineering Support as well as Project related services (from concept to detailed engineering and client representation for EPC Management).

TANK DEMOLITION

We have extensive experience in tank demolition and decommissioning , with hydraulic demolition equipment that ensures that no personnel are required in the drop zones during demolition.

Selection of debris enclosures from 12 Mil. Sandblasting enclosures to Ultra Strong debris protection

- Easy to install with bungee ties
- Twice the strength of standard netting
- UV treated, flame retardant, weather and tear resistant
- Creates temporary weather enclosure and contains dust & debris
- Handles high temperatures while allowing sunlight through
- Protects pedestrians and workers from falling objects.
